

AI-powered analytics that build with you, securely, scalably, and fast.

A smarter way to embed, explore, and act on data. Designed for builders, trusted by global market leaders.

Generative AI has supercharged development velocity—but it's also raised the bar. Now, your customers expect every product to be smarter, faster, and more intuitive.

Building great data-driven experiences inside your product is already complex. Embedding AI into those experiences? That's next-level hard. It demands time, expertise, and infrastructure that most teams simply cannot spare.

✦ Sisense Intelligence

AI that builds with you. Intelligence that delights your users.

Free your teams to focus on innovation, not infrastructure. Sisense Intelligence gives you the AI-powered tools to build faster and the built-in, intelligent data experiences your users expect. A unified suite of capabilities makes it easy to explore, build, and embed analytics experiences, so your product stands out, your end-users get answers faster, and your team remains on the cutting-edge.

What is Sisense Intelligence?

Sisense Intelligence is a unified suite of capabilities that makes it easy to model, explore, build, and embed analytics experiences. The result: your product stands out, your end-users get answers faster, and your team stays on the cutting edge. Built into the Sisense platform, these tools help teams move from data to action, no matter their technical level.

Core capabilities include:

- **Assistant** – An AI-first interface for both developers and viewers, streamlining everything from data modeling and embedding to insight generation.
- **Narrative** – Auto-generates a text summary in plain language.
- **Forecast** – Predict patterns and identify shifts before they happen.
- **Trend** – Helps analyze data patterns over time.
- **Explanation** – Instantly identify drivers behind data changes.

Secure & Responsible AI for Trusted Insights

Sisense Intelligence integrates AI with a security-first approach, empowering you with transformative insights while ensuring your data remains protected. Our commitment to trust is underscored by our upcoming ISO 42001 certification for our AI management system.

- **You're in control:** Seamlessly integrate your own OpenAI/Azure OpenAI models (BYO LLM), activate AI functionalities on an opt-in basis, and precisely define data inputs.
- **Your data stays yours:** Critically, your data is never used to train our AI models, ensuring its privacy and integrity.
- **Robust security foundation:** Your data benefits from single-tenant isolation and strong encryption at every stage.
- **Transparent and human-centric AI:** We champion transparency through explainable AI and ensure essential human oversight, so you can leverage AI with full confidence.

Built for builders. Optimized for speed.

Whether you're a product manager building the experiences for your customers, or a developer modeling data, designing dashboards, and embedding insights into your app, Sisense Intelligence helps you deliver results faster.

- End-to-end AI analytics creation from modeling to creating dashboards to embedding insights in your apps.
- Go from data to insights in minutes.
- Empower users with intuitive, self-service insights.
- Auto-generated CSDK code snippets to embed widgets or entire dashboards.
- Accelerate development with AI editors your team already trusts, like Cursor.
- Tap into your existing agent workflows with Sisense APIs.
